DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what the applicant is attempting to claim with regards to “estimates x”, and “transmit values y”, since applicant has failed to particularly point out and distinctly claim limitations drawn towards “x” or “y”.

3. Claim 10 recites the limitation " mu-law , and A-law ". There is insufficient antecedent basis for this limitation in the claim. The examiner is unclear what mu-law or A-law has to do with encoding the system or what encoding system has to do with the claim?

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed subject matter fails to result in a physical transformation nor does it appear to provide a useful, concrete and tangible result.

Response to Arguments

5. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.
